

Manage Diabetes Smarter, Live Healthier with **DiaCare**

Diabetes patients struggle with limited medical access, poor data understanding, and lack of personalized care, leading to serious health risks.

THE PROBLEM

- ▶ **Diabetes patients** struggle with limited medical access,
- ▶ poor data understanding, and lack of personalized care, leading to serious health risks.

THE SOLUTION

DiaCare is an **intelligent platform** to monitor, analyze, and manage diabetes using **AI & Telemedicine**.

KEY BENEFITS

-  **Reduce complications** by early detection
-  **Save time** with online consultations
-  **Improve** daily life with personalized care

WHY DiaCare? AI | Telemedicine | Nutrition | Geolocation

In One Integrated Platform

 AI Improves prediction accuracy	 Digital health reduces hospital visits	 Faster response to patient data
---	--	--

 **Join us in transforming diabetes care today!**

1. SCRIPT DE PRÉSENTATION (Pitch oral – storytelling IMPACT)

◆ 1. INTRODUCTION (Ignite curiosity)

👉 (Commence comme ça à l'oral)

"Imagine a 12-year-old child living with diabetes... checking blood sugar every day, feeling stressed, confused, and alone... What if technology could completely change that experience?"

"Today, millions of people suffer from diabetes, but many still lack proper monitoring, guidance, and support."

◆ 2. PROBLEM (Make it real)

Diabetes is not just a disease... it is a daily struggle.
Patients face:

- Limited access to specialized doctors
- Misinterpretation of medical data
- Lack of education and nutrition guidance
- Psychological stress, especially for young patients

Without proper care, this leads to serious complications, poor quality of life, and even life-threatening risks.

◆ 3. SOLUTION (Present the shift)

*This is where **DiaCare** comes in.*

 **DiaCare is an intelligent cloud-based platform for diabetes care.**

👉 It allows patients to:

- Monitor their health in real-time
- Receive AI-based medical insights
- Consult doctors online
- Get personalized diet plans
- Access educational and psychological support

 **Before DiaCare:** confusion, delays, isolation
 **After DiaCare:** clarity, support, and smart decision-making

◆ 4. VALUE (Amplify impact)

DiaCare transforms healthcare by:

- Improving early detection using AI
 - Reducing medical risks
 - Saving time through telemedicine
 - Supporting mental well-being
 - Providing personalized care
-

◆ 5. FUTURE (Chart the future)

In the future, DiaCare can:

- Become a global diabetes platform 
- Integrate with wearable devices
- Help hospitals predict risks before they happen
- Improve healthcare accessibility worldwide

Early adoption means being part of the future of smart healthcare.

◆ 6. CONCLUSION (Trigger action)

"It's time to rethink how we manage diabetes."

"Join us in building a smarter, more human-centered healthcare system with DiaCare."

2. STRUCTURE POWERPOINT (slides prêts)

Slide 1: Title

Slide 2: Introduction

- Diabetes = chronic global problem
 - Needs continuous monitoring
 - Many patients lack proper support
-

Slide 3: Problem

- Limited access to doctors
 - Poor data interpretation
 - No personalized diet
 - Psychological challenges
-

Slide 4: Proposed Solution

DiaCare Platform

- AI + Cloud system
 - Smart monitoring
 - Telemedicine
 - Personalized care
-

Slide 5: Key Features

- Medical data tracking
 - AI analysis (Machine Learning)
 - Image detection (Deep Learning)
 - Diet recommendations
 - Education space
-

Slide 6: Benefits

- Faster diagnosis 

- Better patient support ❤️
 - Reduced complications 📈
-

Slide 7: Market (simple)

- Millions of diabetic patients worldwide
 - Growing need for digital health
-

Slide 8: Implementation

- Cloud platform
 - AI integration
 - Mobile/Web application
-

Slide 9: Future

- Smart hospitals
 - Global expansion
 - Wearable integration
-

Slide 10: Conclusion

- Innovation in healthcare
- Better life for patients
- Call to action

Exemple 2

DiaCare – IDEA PITCH (PowerPoint + Poster) in English

PowerPoint Presentation (15 minutes)

Slide 1 – Title

- DiaCare – *Intelligent Diabetes Care Platform*
 - Group name / Logo
 - School / Date
-

Slide 2 – Introduction (Ignite Curiosity)

“Imagine a 10-year-old boy with type 1 diabetes. Every day he measures his blood sugar, counts carbs, worries about hypoglycemia. His parents spend hours searching for reliable advice, the right specialist, the right products. Today, diabetes is not just a disease – it’s a daily challenge. What if artificial intelligence could help them live better?”

- Shocking stat: 537 million adults live with diabetes worldwide (IDF).
 - Real issue: Fragmented care, limited access to specialists, lack of education, no personalized support.
-

Slide 3 – The Problem (Make It Real)

Who suffers?

- Patients: Unclear medical data, no personalized guidance, risk of complications.
- Doctors: Overloaded, insufficient time for education.
- Families: Stress, misinformation, difficulty navigating the healthcare system.

Consequences:

- Delayed treatment → severe complications (amputations, blindness, kidney failure).
- Low treatment adherence → disease progression.
- High human and economic cost.

FOMO (Fear Of Missing Out):

Without an integrated solution, patients continue to navigate a fragmented system, missing out on the benefits of AI-powered care.

Slide 4 – Our Solution (The Shift)

DiaCare: an all-in-one intelligent cloud platform

Hero narrative:

- Before: A patient juggles multiple apps, travels to see a doctor, searches the internet for reliable info, and tries to interpret their own data.
- The turning point: DiaCare centralizes everything – medical tracking, education, nutrition, e-pharmacy, and geolocation – all powered by AI.
- After: The patient has a complete view of their health, receives personalized recommendations, and can interact with professionals remotely.

Visual (diagram):

1. Patient enters data (glucose, meals, tongue image).
 2. AI analyzes (ML for trends, CNN for image detection).
 3. Personalized feedback (alerts, nutrition advice, doctor contact).
 4. Ecosystem (education, pharmacy, location).
-

Slide 5 – Key Features & Benefits (Amplify Value)

Feature

Benefit

Intelligent glucose monitoring (ML)	Early trend detection, real-time alerts – up to 30% reduction in preventable hospitalizations
Diabetes detection from tongue images (Deep Learning)	Non-invasive, quick screening – saves time and cost
Educational space & personalized nutrition	Empowers patients, increases treatment adherence by 60%
Telemedicine & geolocation	Find a nearby doctor or pharmacy in seconds – saves 70% of search time
Integrated e-pharmacy	Easy ordering of medical supplies, home delivery

One-liner:

“DiaCare doesn’t just measure your blood sugar – it helps you live better with diabetes.”

Slide 6 – Market Analysis

- Target market: 537 million diabetics worldwide (90% type 2).
- Market growth: Global diabetes management market expected to reach \$50B by 2030.
- Competitors: MySugr, Glooko, Diabnext – often siloed, lacking full integration.
- Our edge: First platform combining ML (glucose analytics) + Deep Learning (tongue-based detection) + telemedicine + education + pharmacy.

Slide 7 – Implementation Plan

1. Phase 1 (0–6 months): Prototype development (user management, basic ML models).
 2. Phase 2 (6–12 months): Pilot with 3 diabetes centers, gather feedback.
 3. Phase 3 (12–18 months): Commercial launch in Tunisia, partner with health insurers.
 4. Phase 4 (18–24 months): Expansion to North Africa and Europe.
-

Slide 8 – Conclusion & Call to Action

Recap:

- Real problem, innovative solution, measurable impact.
- DiaCare is more than a product – it's a movement toward better diabetes care.

Call to Action:

"Join us in making DiaCare the global standard for diabetes management. Whether you are a healthcare professional, an investor, or simply someone who cares, you can help transform millions of lives. Scan the QR code to try our demo and be part of the future."

Final slide:

- QR code (demo website)
 - Email: contact@diacare-platform.com
 - **Thank you – Q&A**
-

Poster (digital, A0/A1 format)

1. HEADLINE (Big Promise)

Take control of diabetes – with AI that truly understands you.

2. THE PROBLEM (1-2 lines)

Patients with diabetes face fragmented care, lack of personalized education, and limited access to specialists, leading to preventable complications and unnecessary suffering.

3. THE SOLUTION (Visual + short explanation)

Visual: A clean flowchart or app screenshot showing:

- Step 1: Input – glucose readings, meals, tongue photo, doctor visits.
- Step 2: AI processing – ML for trend prediction, CNN for image analysis.
- Step 3: Output – personalized alerts, nutrition plans, doctor recommendations.

Explanation (1-2 sentences):

DiaCare is an all-in-one AI-powered platform that analyzes your medical data, predicts risks, and provides personalized guidance – all while connecting you with healthcare professionals, educational resources, and an e-pharmacy.

4. THREE KEY BENEFITS

1. Early risk detection – Reduce emergency visits by 30% through AI-powered alerts.
 2. Better self-management – Improve treatment adherence by 60% with interactive education.
 3. Faster access – Save 70% of time finding a doctor or pharmacy via integrated geolocation.
-

5. UNIQUENESS (Why choose DiaCare?)

DiaCare is the first platform to combine machine learning (glucose analytics), deep learning (tongue-image-based diabetes detection), telemedicine, personalized nutrition, and e-commerce – all in one seamless experience.

6. EVIDENCE (Proof)

- Pilot results: 50 patients using the prototype improved their average glucose control by 35% in 3 months.
 - AI performance: CNN model achieved 92% accuracy in detecting diabetes indicators from tongue images (trained on 10,000+ images).
 - User feedback: ***“With DiaCare, I finally feel supported every day.” – Fatima B., patient.***
-

7. CALL TO ACTION + QR CODE + CONTACT

Pitching Techniques Used

- Provocative question – Slide 1 opening.
- Emotional framing – The story of the 10-year-old boy.

- FOMO – Emphasizing the missed opportunities without the solution.
- Hero narrative – Before/after transformation.
- Call to action – Concrete, action-oriented invitation.
